

Process Characterization

Product Characterization

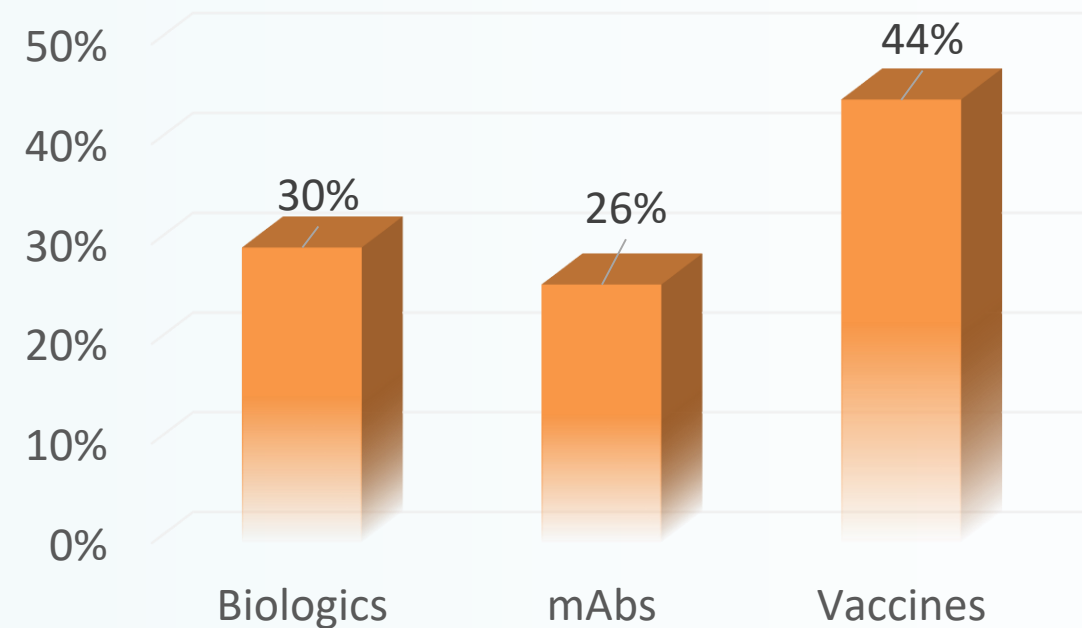

- Completed > 40 Characterization Projects
- Supported > 15 Regulatory Submissions
- Worked with > 10 Biosimilar Developers Worldwide

Diversity of Process Linked Characterization Project Completed

Diversity of Product Linked Characterization Project Completed

Some of the Product that we have Characterized

- Transtuzumab
- Dengue mAb
- Rituximab
- Bevacizumab
- EGFR
- Erythropoietin
- FHA
- CRM197
- Diphtheria Toxin and Toxoid
- Tetanus Toxin and Toxoid
- Pertactin and Pertussis Toxins
- Hepatitis-B
- HPV6 / HPV11 / HPV16 / HPV18
- Bacillus Calmette–Guérin (BCG)
- Interferon–beta (INF- β) / PEGylated INF- β
- Low Molecular Weight Heparin (LMWH)
